Ok just got off phone with Dr Lynn she recommended starting lithium 300 twice per day at 9am and 5pm and checking the lithium level and thyroid in a week prior to follow up office visit in 2 weeks. I will add the new lab slip with they thyroid level up at the front that you can pickup and complete prior to our next office visit after you guys get back from the trip. I'll also send the mini pill to the pharmacy in a moment.
