And he and Paul rode around the fields, inspecting the property. They were just, you know, hanging out together. And then they met their mother, and they had dinner. I've got all their phone records leading up until the murder. And they're talking to each other. Maggie's talking to Paul, and Paul's talking to Alex. They were communicating in a very loving fashion. After dinner, Maggie left the house to go run the dogs. Paul left the house 'cause Paul never stayed inside. And Alex, frankly, doesn't know where Paul went. Alex says that he laid down on the couch and watched TV and fell asleep. And he woke up about 9:00, and he wanted to go check on his mother so tries to call Maggie first, and she doesn't answer. And he tries to call Paul, and he doesn't answer. And he texts Maggie and says, "I'll be right back." He leaves. And he is on his phone from 9:03 through 9:21. At 9:21, he calls his mother's house phone, asking the nurse's aide to let him in. His mother's in bed. She has dementia. She's watching a game show. And Alex sits on the bed, and the nurse's aide says he's same old Alex. There's no stress. And he stays there for about 20 minutes. And then he comes back, and he gets on the phone again. And he's chatting it up with his friends. And then he arrives back to Moselle, a little bit after 10:00. The house was still locked up, and there'd been no sign that either Paul or Maggie had come into the house. He got back in his car and drove down to the dog kennel.</p>

Now, to walk over to her--possibly still on the ground, begging for her life--and then to stand over her and shoot straight down to the ground into her head, that's--I think it's unfathomable for a normal human being.</p>

A SLED spokesperson tells me that while this is being called a double homicide, there is no danger to the public right now and that at last report, they were not looking for suspects in this case. After the murders, there was a call to say that the public is not in danger, which would let you think that they know exactly who the killer was. The person that finds the body, many times, is a prime suspect. But Alex had a specific and potentially convenient alibi if you go see one of your parents at the same time that these murders happened.
	01:33:30	PRODUCER (OS) Can someone confirm that he was--when he get at his mom's house?
	01:33:34	ANDREW (ON/VO) I don't think, at this point, we know if anybody was there with her. No one has come out to give him that full alibi, and the only person who could has dementia, and her mind is not all the way there. Chris in an interview.	01:37:56	CHRIS (VO/ON) It's been reported that there was a spatter pattern on Alex's shirt. You know, you shoot somebody in the head with a shotgun, that's gonna be a massive explosion of blood and tissue. The same thing with the AR-15. The bullets are traveling so fast, a high-velocity mist is created because it goes back in the direction of the object that fired at them. The closer I am to you when I shoot you, it's gonna create more spatter back on that individual. That's incredibly damning evidence when you had to be the one that pulled the trigger.
